

I have known Dr. Neff for about 20 years...

He has performed 6 surgeries for me, the latest being 3 months ago when I had both knees replaced a week a part.

He has taken time to explain things to me and answer any questions I or my wife have had. One night a few months ago, after I had the first knee surgery and right before the second, I had some real concerns and was not sure if I should go through with the second surgery. Being the weekend, I called the answering service and they said they would pass the word to Dr. Neff who

was on call. He called me a few hours later (Saturday evening) and took time to listen and reassure me. I later found out that he had returned my call from St. Louis!

Dr. Neff's staff is second to none. When I returned to the doctor's office after 4 weeks, every one of his staff were so encouraging. They seemed like professional cheerleaders!

Dr. Neff and his staff have helped me deal with my pain and get back to living. My rehabilitation is coming along nicely. I am really thankful that I had Dr. Neff!

Jan Grace

If you've been told you need a new hip, knee or shoulder.

Don't put it off any longer.

Dr. Neff can get you back to the activities you love.
